FAMOUS\$ MILLIONAIRES\$ GAME

Object of the Game: To create the highest possible 7 digit number using the cards that you randomly select.

Players: 2 to 4

Rounds: 2 to 4 (each round is considered a year)

Materials: One deck of math flashcards. One scoring sheet and one card placemat for each player.

Instructions: The group decides on and circles below what type of **MILLIONAIRES\$** they want to play as and place that title card in the middle.

The flash cards are shuffled or mixed together and then placed in a stack face down at the start of each round.

The youngest player goes first and selects the TOP card from the stack.

She/he then places their card in a place value holder on their placemat.

The player to their left goes next (clockwise).

A round is completed after every player selects and places 7 cards and completes their 7 digit number.

After each round, EVERY player writes down ALL of the numbers.

Then the group works together to rank the numbers and gives 1 point to the lowest number, 2 points to the next, and so on.

After the pre determined number of rounds are completed, the player with the most points is the winner.
